Yohannes Teffera

Backend & Data Engineer(AI)

yohannes.ahunm.teffera@gmail.com Addis Ababa Github Linkedin
Leetcode

OBJECTIVE

Reliable and detail-oriented engineer looking for an opportunity where I can make the best of my potential.

EXPERIENCE

AI Engineer at **Artekia** : Python | LangChain | LangGraph | TypeScript | Next.js Sep 2025 - present

- Built an Excel Add-in chatbot using Vercel AI SDK and developed 5+ AI tools for document generation, data extraction, and intelligent search
- Built a legal-doc RAG chatbot for Spanish police officers.
- Created a LangGraph multi-agent system for bookings, flight-status, and travel support for Umoja Airways.

Data & Backend Engineer at **Aladia**: Python | GCP | MongoDB | Nest.js | Apache Beam Aug 2024 - Sep 2025

- Engineered a real-time Change Data Capture (CDC) ETL pipeline using Atlas Triggers, BigQuery, Dataflow, Pub/Sub, Apache Beam, and GCS, supporting over **50,000** active users.
- Developed optimized MongoDB aggregation pipeline queries.

Data & AI Engineer at **StartupAgile**: FastAPI | AWS | LLMs | Langchain | GenAI Dec 2022 - Sep 2024

- Developed Discord Customer Service bot (RAG) for crypto trading server with a with Ollama, llama3 and ChromaDB, deployed on AWS EC2.
- Built AutoRecycler for archiving & restoring assets/data on Iconik & AWS S3, and integrated Whisper for audio to text translation.

Backend Engineer at **Addis Home Finder**: Python | Audio Signal Processing |Fingerprint Feb 2021 - Nov 2022

- Developed Media Monitoring System focused on media files recording, scheduling & advert matching with open source fingerprinting algorithms.
- Achieved advert detection with a precision of 2 to 5 seconds with long audio and video files.

EDUCATION

Addis Ababa University
BSc in Software Engineering(Artificial Intelligence Stream)
CGPA: 3.86 / 4.00

Africa To Silicon Valley(Backed By Google)
Code Academy | DSA

- Solved 600+ problems across LeetCode, Codeforces, and HackerRank, with 18+ data structures mastered.

PROJECTS

Amharic Text Summarization: PyTorch | Transformers | Hugging Face

- Implemented extractive summarization and achieved a Rouge score of 0.75 and used in school offices.
- Fine-tuned MT5 for Amharic summarization in PyTorch, achieving Rouge of 0.65 with 20,000 data samples

Chatbot : Langgraph | Langchain | FastAPI | Next.js | Docker

- Developed a chatbot using Groq and Gemini LLMs that searches the web, retrieves referenced documents, and reasons over them to answer user queries..

SKILLS

Advanced: Python, FastAPI, Django, PyTorch, Langchain, LangGraph, RAG, Agents, JavaScript, TypeScript, NextJs, NestJs, Docker, API Integration, CI/CD, AWS, GCP, Analytics, Apache Beam, Dataflow, Bigquery

ACHIEVEMENTS

1th scorer from my city in the Ethiopian University Entrance Examination.

Active participant in CODEMASTER's 2023 Coding Competition.
